OPERATION INSTRUCTIONS  Crestron 4 Input
This console is equipped with a PC computer, DVD/Blu Ray Player and Doc Cam connected to a digital video projector. Laptops connections are available.

A Crestron Touch Panel is utilized for control. If the panel has gone to sleep, touch it to resume.

Press Power On Room to get started.

Once the projector has warmed up the PC Computer will be selected. Other devices may be selected in the left column.

Laptop display cables are available in the cubby beside the touch panel. Audio Volume can be adjusted with the control bar on the right.

When selected, controls for the DVD/Blu Ray player will appear on the touch screen. If you’d like to temporarily hide your presentation, press Projector Mute located on the lower right.

When finished with your presentation, Please:

- Press Exit to POWER OFF PROJECTOR
- Sign Out of PC (Do Not Shut Down PC)
