

## Enroll an Android phone on the secure wireless network

Follow the steps below to enroll an Android phone on the secure wireless network. These steps must be performed from the device that you are enrolling!

**Please Note** These instructions are based on Android 5.0. The steps in this guide may be slightly different depending on the model of phone you have, and the OS version you are running.

1. Open **Chrome** and visit: <http://rite.buffalostate.edu/secure-wireless.html>
2. Tap one of the **Enroll Your Device** links.
3. When the **Welcome to Buffalo State's secure wireless network** screen appears, tap **Continue**.
4. Enter your Buffalo State username and password, tap **Continue**.
5. On the next screen, tap **First, Install The App**.

6. On the next screen, tap **Google Play**.

7. When the Play store opens, tap **Install**, tap **Accept**.

**IMPORTANT! DO NOT CLICK OPEN WHEN INSTALL COMPLETES!**

8. When the install completes, tap your phone's **recent apps / task manager** button and return to the screen shown below.

9. Tap **Next, Configure Your Device**.

10. Tap **Continue** and wait a few seconds while your connection is configured.

Your device should now be connected to the **Bengal** wireless network.
